MONOLITHIC GLASS

LAMINATED GLASS

V = 1st glass + intercalated films + 2nd glass

Available for glass thicknesses from 8 to 31.52 mm, for other thicknesses please consult us.

It is important to provide the following information with each request: the glass composition (ex.: 10mm monolithic, 8.8.4 laminated, 8.8.2-12-10 insulating) / the length and diameter of the threaded axle if not standard dimensions (M14, 65mm) / the reference of the spider to be used as support, or the thickness of an existing support for the delivery of the spacer.

Suggested mounting instruction

Insert parts No.1/2, 4, and 3 into the glass hole.

Mount the second contact washer No.4 and glass nut No.5 and tighten to 20Nm (15 ft-lb) for monolithic glass and 10Nm (7.5 ft-lb) for laminated glass using tools SADEV ref. 097581160.

Mount nut No.6 and washer No.7 onto parts No.1/2.

Insert the thread axle into the support with spacer E (available on request), see technical page. Adjust the depth.

Mount the second washer No.7, lock washer No.8, and nut No.9 and tighten to 60Nm (45 ft-lb) using a 22mm wrench.

SADEV recommends using thread locking compound whenever possible.
